

Trafilerie di Valgreghentino

EUROPEAN REGULATION n° 1907/2006 “REACH” Registration, Evaluation, Authorisation and Restriction of Chemicals

Dear Customer,
our company Trafilerie di Valgreghentino SpA carefully follows the development and the instructions of European Regulation n°1907/2006 “REACH” in order to fulfil all requirements. This involves the entire supply chain, from our internal system to our downstream users.

In accordance with Echa - European Chemicals Agency’s guidelines and with Eurofer - European Steel Association’s declarations, we can assure that our products do not require registration, as they belong to the category of articles containing substances not intended to be released under normal or foreseeable conditions.

Article 33 of REACH Regulation states that producers, importers and other suppliers of articles containing substances of very high concern (SVHC), contained in the candidate list updated on 23/01/2024 for authorization (Annex XIV) with a threshold above 0.1% (w/w), have to provide information about the substances to the recipients. We can assure that no such SVHC is present in our products.

We will keep ourselves updated on the future development of Reach Regulation and we will inform you if there is any deviation from our present conditions.

With kind regards

29/01/2024

Trafilerie di Valgreghentino SpA
